ACCOUNTING AND STATISTICAL NOTICE NO. 516

Revision to Statistical Edit Package

The Governing Committee, at its February 17, 2010 meeting, approved the addition of two new fields to the Private Passenger Liability and No Fault premium and loss record layouts: Continuous Coverage Discount and Low Frequency Discount. These fields will indicate if the discount has been applied to the rated driver. The two discount codes have an optional reporting date of 4/1/2010 and a mandatory reporting date of 1/1/2011. As a result of the new fields, CAR created two new statistical edits: S50 – Continuous Coverage Discount Code and S51 – Low Frequency Discount Code. The Statistical Edit Package on CAR's website has been updated to include these new edits. The changes are outlined below.

Table with 2 columns: Edit, Change. Row 1: S50 – Continuous Coverage Discount Code, For Subline 621 and 625 only, the continuous coverage code must equal space, 0, or 1. Row 2: S51 – Low Frequency Discount Code, For Subline 621 and 625 only, the low frequency discount code must equal space, 0, or 1.

This notification is being forwarded to the designated individual in each company's Statistical Department. Please bring these changes to the attention of all affected parties.

Contact your Data Analyst with questions regarding any edit changes or reporting requirements.
