MAIP STEERING COMMITTEE MAIP POLICY APPLICATION SYSTEM RMV PRE-FILL – OPERATOR INFORMATION

At the previous meeting, the Committee requested staff to prepare an assessment of the MAIP Policy Application data fields that could be pre-filled by accessing the Registry of Motor Vehicle files and whether that data could then be updated by the producer filing the application. Please find staff's assessment as follows:

<u>Field Name:</u>	<u>Update Recommendation</u>	<u>Comments</u>
First & Last Name	Yes	System will write a comment into the Remarks field
Address	Yes	System will write a comment into the Remarks field
Date of Birth	No	Use the Remarks field to indicate a difference
Merit Rating	No	Use the Remarks field to indicate a difference
Date 1 st Licensed	Yes	System will write a comment into the Remarks field
1 st Lic Motorcycle	Yes	System will write a comment into the Remarks field
Driver Training	No	Registry is effective in collecting this data. Use the Remarks field to indicate an out-of-state DT program
Owed Premium/Co	No	Use the Remarks field to provide more information
<u>New field added to the Data Stream:</u>		<u>Description</u>
Unsuccessful Pre-Fill		N will be indicated by the system if pre-fill is unsuccessful

Additional Comments:

The Remarks field will be segmented in order to provide information for the various fields. More technical information will be provided once the detail system updates have been finalized.

If the producer changes the data in one of the allowable fields, CAR is not planning to maintain nor provide the original information. Accordingly, if there are additional changes to the same field or if the producer ultimately updates the information back to the original RMV data, CAR will not be able to indicate this.
