COMMERCIAL LINES NOTICE NO. 174

Commercial Residual Market Rule/Rate/Form Filing
SERFF Tracking Number: CARI-135140925

CAR made a Massachusetts Commercial Residual Market rule, rate and form filing with the Division of Insurance on October 28, 2026, with the effective date to be set to the date of approval.

This filing proposes adoption of CA 04 44 – Waiver of Subrogation that includes a schedule of individuals or organizations for whom the endorsement would apply due to contractual requirements. The filing also requests approval of CR 99 12 – Primary and Noncontributory – Other Insurance Condition, a CAR-specific endorsement that will also require a schedule of organizations with contractual requirements necessitating the endorsement. The endorsement also includes new language that ensures it does not conflict with other insurance conditions pertaining to TNC (Transportation Network Company) activities defined in CR 99 04. Finally, proposed language to add Rule 49 to the Commercial Automobile Insurance Manual that provides instructions for use of these endorsements is also included in the filing.

For planning purposes, the filed rules, rates and forms are available to Member Companies upon request. Requests should be directed to ActStatDept@commauto.com.
